

Fall 2025

# Online Success Coaching

WHITE PAPER

# Executive Summary

## Purpose Statement

The Online Success Coaching (OSC) program provides personalized, proactive support to SLCC's online learners, helping them navigate challenges and achieve their goals. Through holistic, student-centered coaching, we foster student persistence, academic success, and personal empowerment through high-touch, data-informed, and relationship-based coaching that connects students to resources, builds resilience, and supports individualized goal achievement—ensuring every student has the tools and encouragement to succeed.

**We align efforts to SLCC's Vision Matrix and measure this through:**

- **ENGAGE**

- **“High touch to resources”**
  - % of proactive cohort outreach (prior to and first 3 weeks of the semester)
  - # of specific, timely outreach (calls, texts, emails)
- **“Holistic, student-centered coaching”**
  - # of evidence-based and best practice coaching methodologies, training, conferences, cross-departmental collaborations, and bi-weekly resource sharing

- **COMPLETE**

- **“Data-informed resilience building”**
  - % of Canvas activity/engagement and assessment data
  - % persistence rates from semester to the next
- **“Relationship-based coaching to support individualized goals”**
  - # and % of monthly online check-ins and semester survey assessment tools

# What this could look like:

## Program Objectives and Significant Student Learning Outcomes

### **Students who connect at least 3 times in a semester with OSC will:**

1. Identify, navigate, and connect with in-time college resources through monthly phone calls, texts, and email.
2. Reflect, self-assess, and build academic skills and confidence to determine S.M.A.R.T semester goals through monthly communication and coaching.
3. Communicate and collaborate with their coach to more fully engage in the online college experience through outreach and the completion of assessment tools like monthly check-in forms.
4. Persist into the next semester and increase their capacity for higher academic performance through outreach and interface with the self-enrolled Canvas course, as well as completing assessment tools like beginning and end of semester surveys.

### **\*Dashboards could be created for each objective**

- Totals of (outreach) calls, emails, texts, appointments and totals of resources shared/type of resources shared
- Total goals officially set with coach and progress towards those goals
- Total engagements or percentage of engagement in Canvas and visualization data for monthly check-ins
- Persistence rates and visualization data from surveys
