Generative AI:

Leveraging AI tools to enhance bot performance & staff efficiencies.

- In Fall 2025, Mainstay introduced our Generative AI in Knowledge Base functionality as a product enhancement, at no additional cost to our existing partnerships.
- Partners who adopted this tool saw the following data trends.
 - Decreased missed questions
 - Increased Match rates
 - Increased user reported positive feedback

Fall 2024 – Fall 2025:

Partner Engagement Trends

The following data report shows the trends for Mainstay partners who switched to Generative AI with similar use cases. Should you adopt this approach we expect to see similar results.

Missed Questions

- **Feature enhancement:** Flash Responses

Average missed questions in **Fall 2024 was 459**

Average number of missed questions in **Fall 2025 was 35**

AI Match Rate

- **Feature enhancement:** Generative AI in Knowledge Base

Average match rate for bots in **Fall 2024 was 70%**

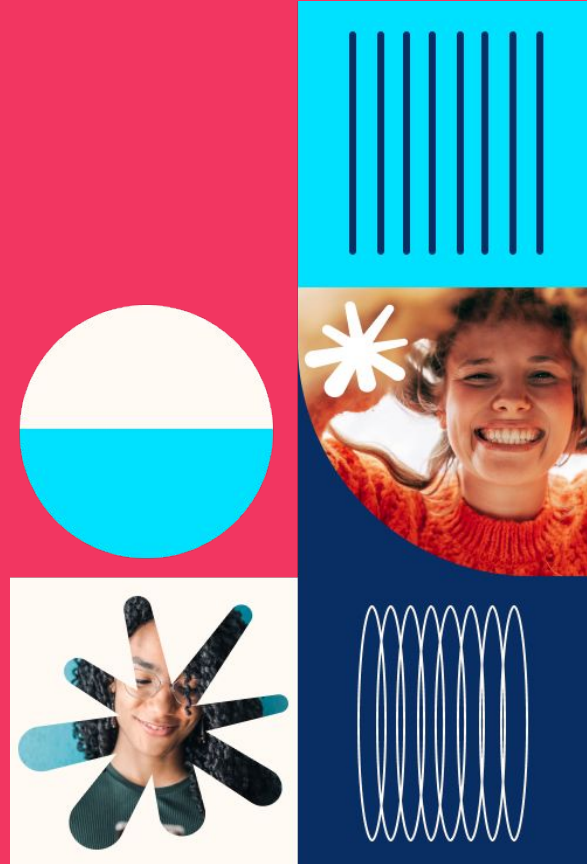

Average match rate for bots in **Fall 2025 was 83%**

Positive Feedback

In **Fall 2024 28%** of users scored the bot's responses as positive.

In **Fall 2025 66%** of users scored the bot's responses as positive.

why was mainstay founded?

AI Generated Response **Gen AI Transaction**

Mainstay was founded in 2014 by Drew Magliozzi and Kirk Daulerio with the vision to make college access more equitable through technology. Their passion led to the creation of AdmitHub, a student engagement platform using behaviorally intelligent chatbots to support students throughout their higher educational journey.

Generative AI created conversations & student profiles

Using [Generative AI Discussions in Scripts](#)
you can:

- Provide learners with prompted responses built on your campus/department websites
- Leverage the power of Human Centered AI Enhanced functionality
- Create specific learner profiles to understand how to better engage with you learners

Generative AI		
Assistant Features		
Live Chat: response suggestions	☒	Provides contextually relevant message suggestions during Live Chat conversations.
Knowledge Base: response suggestions	☒	Displays an AI assistant when creating and editing Knowledge Base responses.
Knowledge Base: fuzzy question generation	☒	Generates variations of an understanding's summary question to improve the accuracy of knowledge matching.
Contacts: conversation summaries	☒	Generates a summary of recent messages and displays on the contact profile.
Escalations: response suggestions	☐	Generates a suggested reply when an escalation is triggered and includes it in the escalation email.
Escalations: conversation summaries	☒	Generates a conversation summary when an escalation is triggered and includes it in the escalation email.
Direct-to-learner Features		
Knowledge Base: generative responses	☐	Generates a response to a learner's incoming question if it matches to an Understanding set to be handled by generative AI.
Knowledge Base: generative fallbacks (Flash Responses)	☐	Generates a response to a learner's incoming question if there is no relevant match in the Knowledge Base.
Scripts: gen-AI discussions	☐	Adds a "Gen-AI Discussion" action for Scripts, during which learner messages are handled by a specific prompt with access to specific contextual information.
Scripts: gen-AI voice calls	☐	Adds a "Gen-AI Voice Call" action for Scripts; learners receive a phone call powered by a specific prompt with access to specific contextual information.

Generative Responses for the Knowledge Base

Use AI to build a more robust Knowledge base & Learner Experience!

- Decide if you want a human centered or AI generated response to questions
- Streamline the process to contextualize and update the Knowledge Base
